Sub :- Thanking Mentors.

I'm Angel abisha Final year BDS Student. I myself had not much focus towards my care. I was not able to attend my second year exams due to my health problems and other issues which made me completely difficult to move on the process of learning and understanding the subjects. I appeared the exams later and unfortunately failed in the subjects. After that I was put up to separate batch and I was assigned with a mentor. I thank you mentors today as they really helped me at my lowest they motivated and taught me good values in life. I had individual classes and each department there were assigned teachers apart from my mentor who took classes and encouraged me every time. They made me understand the subjects well. They took care and taught me the hands on skill in clinical well. All this helped me to improve far more better. I am grateful to their support and giving knowledge. I thank them for what I am today.

Thank you.

Yours faithfully,

  
Angel Abisha
